

Name: \_\_\_\_\_

### **Ancient India Cause and Effect Chart:**

1. Read pages 144-145 in your social studies textbook.
2. Take notes and write down examples of effects of geography (Himalayas and Indus River) in ancient India.
3. Devise a cause and effect chart/diagram including labels and pictures of the effects of geography on ancient India.
4. Be sure to add a title and add your name to the front of your chart.
5. Use color.
6. Use an ultra-fine sharpie.
7. Be sure to label your chart.
8. Each student should have at least three causes and three effects.
9. See Mrs. Looney's website for examples.

#### **IMPORTANT NOTES:**

**Himalayas:** highest mountains in the world

**Indus river:** India's first civilization

- **Cause:** something that makes another thing happen.
- **Effect:** the result of something else that has happened.
- **Words that signal a cause:** reason, because, motivated, causes
- **Words that signal an effect:** therefore, as a result, for that reason, so, that cause

**Cause and effect:** When heavy snows of the Himalayas melted, the Indus flooded which left behind a layer of silt, which created ideal farmland.
