

# "STUDENT TEACHER"

MRS. LOONEY'S CLASS  
SAMPLE INTRODUCTORY  
POWERPOINT

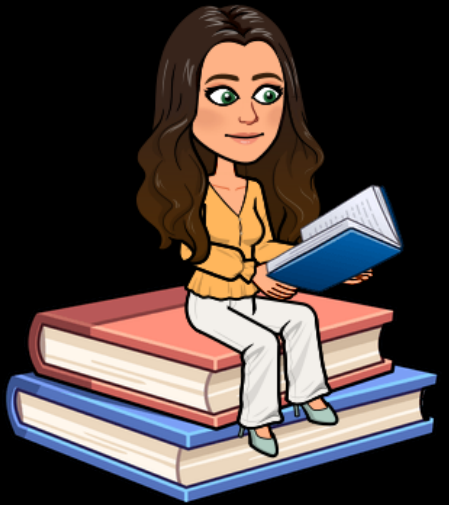

Hello, my name is Ms. Richardson and I would love to tell you a little bit about myself.

Something I am looking forward to this school year is getting to know all of you.

This gets me excited because I am new to the Scio School district and do not have many friends here yet.

Sometimes I get nervous when I think about having to learn and remember so many different names, but I am going to try my best!

I look forward to meeting unique people who I can learn from.

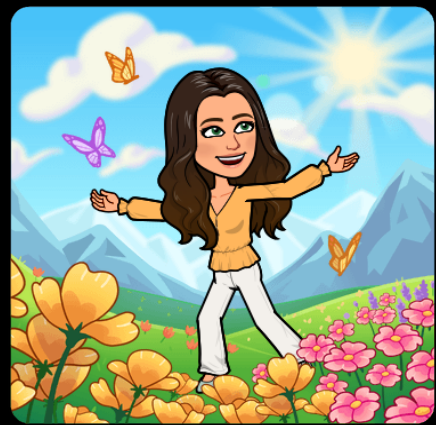

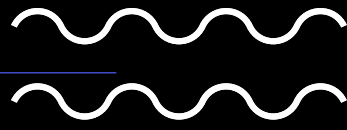

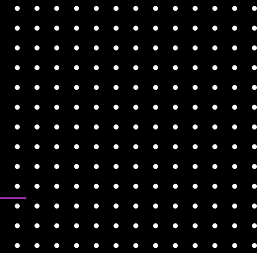

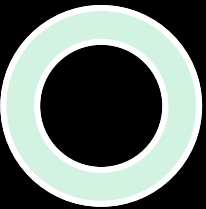

I am very grateful for all the time that I got to spend outdoors this summer!

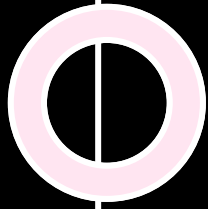

Usually I work multiple summer jobs and am stuck inside a lot, but this summer was different because of the pandemic.

Instead of working so much, I got to make awesome memories with my family doing activities like hiking, camping, and swimming in the lake near my house.

If you can't tell, I really love to be in the great outdoors where every experience is an opportunity for adventure!

I am so grateful for the beautiful weather we had this summer and for the time to enjoy it.

Something that I like about my family is the fact that I get to be a middle child.

I have an older sister named Olivia and a younger brother named Logan.

I am actually very thankful that I am a middle child because I have always had my big sister look up to while also having a younger brother to take care of and look out for.

I think this is the best of both worlds!

I love that my family members are some of my best friends and favorite people to be around.

**FASCINATING**

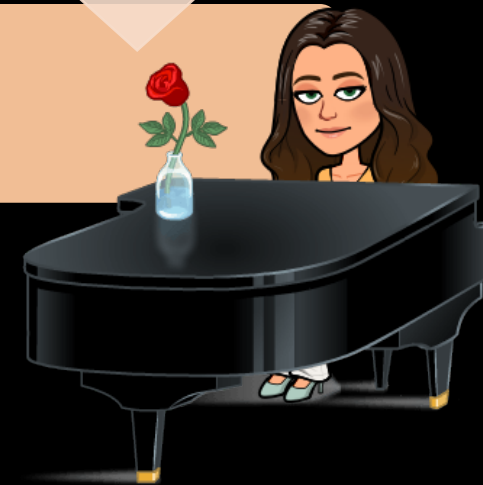

If someone asked me to describe myself I would say that I am an introvert who likes people.

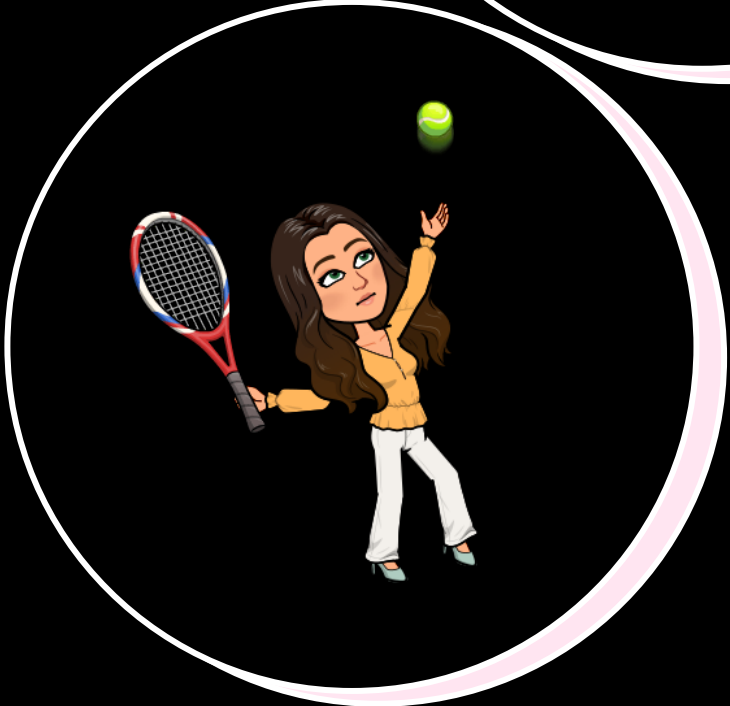

This means that I enjoy my quiet time, but I also value meaningful relationships.

I am also creative and enjoy hobbies where I can reflect beauty in my work through painting, drawing, or ceramics.

I also love to make music by singing, playing piano or guitar.

I am also fairly athletic and love to play soccer, spike ball, pickle ball, and tennis. I even like to run.

Something interesting about myself is that I am left-handed which makes me similar with only ten percent of the population!

Sometimes it can be very challenging when things like desks or scissors are built for right-handed people, or when my pen ink smudges across the page.

Despite these challenges, being left-handed also has its benefits.

Because so many things are built for right-handed people, I have learned to become quite ambidextrous. Ambidextrous means that I can do certain tasks with both of my hands.

For example, sometimes I will accidentally write on a chalkboard with my right hand instead of my left, I can use right-handed scissors, and I can switch a tennis racket between both hands and still hit the ball!
